Jev eval PR still failing overnight; Hetzner warning open; two Luma regs pending

Audiogram-inbox verify jobs for a Jev candidate-ranking branch stayed red into Sunday morning. Typesafe.ai sign-in landed around 1:05 a.m. Hetzner's final warning still has no payment confirmation. Coffee & AI Social and a La Casa de Satoshi talk are waiting on host approval.

Ferdinand, overnight mail is mostly the same GitHub thread repeating: a Jev candidate evaluation and ranking branch on audiogram-inbox keeps failing the verify job (latest around 12:57 a.m. CT on commit 4bf5227). Around 1:05 a.m. Google also mailed that you signed in to typesafe.ai with your account—useful context next to Byte-ByteGo's fresh "Top 9 Places to Use Jev" piece from Saturday afternoon. Separately, Hetzner's Final Payment Warning / Services blocked from Friday is still sitting without a "we received your payment" follow-up.

Two new Luma notices arrived early Sunday: Coffee & AI Social on Tuesday, September 29, 4:00–6:00 p.m. at Café Comunidad is pending host approval, and ¿La IA nos matará a todos? on Tuesday, October 6, 6:00–9:00 p.m. (La Casa de Satoshi) is pending too. The Reap x AIBM Agentic Buildathon seat for Friday, October 9, 5:00–9:00 p.m. at Sandbox Hub stays approved. Looking ahead, weekday rituals return Monday; Redpanda's Streamhouse live panel is Tuesday at 9:00 a.m. PT (~10:00 a.m. CT), and Checkpoint day is Wednesday night after Discovery.

BYTEBYTEGO

EP227: Top 9 Places to Use Jev

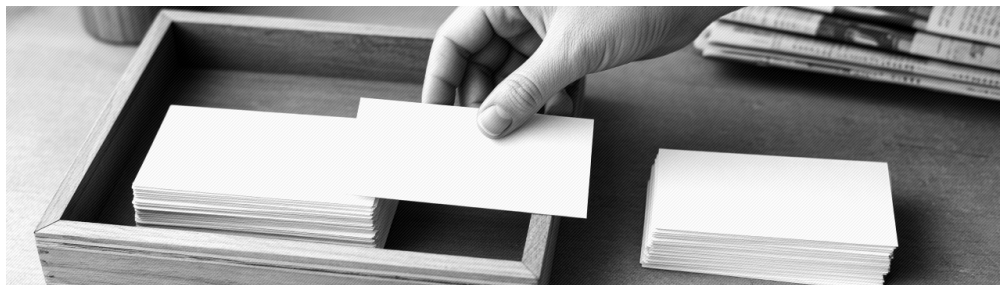

FROM BYTEBYTEGO

Jev is TypeSafe AI's first System One Model. It is 100x faster and cheaper than frontier LLMs.

That opens up a lot of use cases people usually skip because the big models are too slow or too expensive for them.

Here are the top 9 places to use Jev instead of an LLM: model routing, guardrails, gating tool-calls, triage inbox, reranking, LLM evals, bulk labeling, real-time decisions, and a confidence gate.

The bottom line is to use the LLM for generations and use Jev on the decisions around it.

EDITOR'S SUMMARY: The same issue also sketches LLM vs RAG vs AI agent vs agentic systems, compares MCP to local function calling, and layers Claude Code's context window like a nine-ingredient burger. The Rebuild YouTube live course promo is still attached but was already Saturday's last-call; today's clip is the Jev map. Pairs with overnight audiogram-inbox work on Jev candidate evaluation.

TECH NOTES

Weekend gap for TLDR, Every, and Pulse

FROM THE WIRE

No fresh TLDR AI overnight—the Pro Max / Muse / DeepSeek bundle from Friday already ran Saturday. Ryan Sloan's Copilot org-chart piece from Every was Saturday's feature too. The Pragmatic Engineer's last Pulse on CPU shortages printed Friday.

Two markers stay on the board for the week: Redpanda's Streamhouse live panel Tuesday at 9:00 a.m. PT (~10:00 a.m. CT), and the Reap x AIBM Agentic Buildathon Friday, October 9, 5:00–9:00 p.m. at Sandbox Hub.

Also pending host approval: Coffee & AI Social Tuesday 4:00–6:00 p.m. at Café Comunidad, and ¿La IA nos matará a todos? on Tuesday, October 6, 6:00–9:00 p.m. at La Casa de Satoshi.

EDITOR'S SUMMARY: Thin subscription morning. ByteByteGo's Jev roster is the only new clip; use the open Sunday for the Hetzner PDF and the red verify job before Monday rituals return.

ALSO NOTED

Typesafe.ai sign-in at 1:05 a.m.

GOOGLE ACCOUNTS

Google mailed that you shared profile name and email with typesafe.ai via Sign in with Google around 1:05 a.m. CT—same window as the overnight Jev ranking pushes on audiogram-inbox.

A concurrent Mac OS sign-in alert arrived in the same minute. Treat them as one session unless something looks off.

EDITOR'S SUMMARY: Context for the Byte-ByteGo Jev clip and the still-red verify jobs, not a separate calendar item.

DEAR TIMES

Do I chase green checks or clear Hetzner on an open Sunday?

Dear Times, I spent the small hours pushing a Jev ranking branch. The verify job keeps failing. Google says I signed into typesafe.ai around 1 a.m. The calendar for Sunday is empty. Hetzner’s services-blocked warning is still in the inbox with no payment confirmation. Do I keep patching CI, or open the billing PDF while the day is actually free?

– Red at Sunrise in Mexico City

Dear Red at Sunrise, Open the Hetzner PDF and clear the account while nothing else is scheduled. A blocked host can erase the tools you need for Monday’s Miami and Discovery blocks; a red verify job will still be there after lunch. Fix billing on the open Sunday, then return to the Jev branch with a host that still answers.

PATCH RANK FAIL PAID · PAID

WANTED

Human who can read a red verify annotation without starting a twelfth push at 1 a.m.

Must distinguish “fix this test” from “sign into another AI site.” Sunday afternoons preferred.

Host approval for Coffee & AI Social (Tue 4–6 p.m.).

Applicant already pending. Bring conversation, not a street address for the newspaper.

FOR SALE

Slightly used sense of “one more commit.”

Last seen next to a typesafe.ai OAuth receipt. Buyer accepts that green checks are not a personality trait.

Spare ranking rubric (conceptual).

Inspired by a newsletter list of nine places to use Jev instead of a frontier model. Does not make CI pass. Transfers as FYI only.

NOTICES

Municipal cloud cover

High near the mid-20s °C, excellent air, little rain expected this morning. Umbrella more useful Monday. This is weather, not a Luma RSVP.

Department of Unpaid Hosts

Final Payment Warning still open. Citizens with empty Sunday calendars are advised to settle the German-cloud PDF before inventing new agent features.
